
GROUP ENVIRONMENTAL POLICY

Connected Wind Services wants to be an environmentally conscious service and business partner. We will contribute positively to sustainable development by reducing waste and resource consumption and continually improve environmental conditions throughout the company.

Everyone at Connected Wind Services is constantly working with a commitment to protect the environment to create a sustainable development and pollution prevention, this is achieved by systematic work on environmental issues.

How:

- Follow applicable laws and regulations
- Environmental objectives to create participation and dedication, where we will reduce our total carbon dioxide emissions in tons/employee
- By refueling all company cars and service cars with more environmentally friendly diesel (bio diesel), we improve our environmental performance
- Constantly improve our environmental performance and strive to influence our suppliers in the same direction (e.g. avoid plastic cups for reducing the unnecessary usage of plastics)
- Our goal is to combine environmental awareness with customer requirements to achieve profitability and a sustainable development

Felix Overbeck
Chief Executive Officer
Connected Wind Services A/S
