## GROUP ENVIRONMENTAL POLICY

---

Connected Wind Services is an environmentally conscious service and business partner. We will contribute positively to sustainable development by reducing waste and resource consumption and continually improve environmental conditions throughout the company. Our goal is to combine environmental awareness with customer requirements to achieve profitability and a sustainable development.

Everyone at Connected Wind Services is constantly working with a commitment to protect the environment to create a sustainable development and pollution prevention, this is achieved by systematic work on environmental issues and constantly improving our management system. All employees have high awareness and dedication to create a sustainable development.

**Life-cycle approach** – by using refurbished parts we can reduce the impact on the environment. Environmental objectives to create participation and dedication, where we will reduce our total carbon dioxide emissions in tons/employee. Constantly improve our environmental performance and strive to influence our suppliers in the same direction.

Providing high quality performance of maintenance is our goal in order also to extend the lifetime of the wind turbines as much as possible.

**Use of resources** – by having a good planning for the service cars we can reduce the distance that our service cars are driving. Where possible we refuel all company cars with more environmentally friendly fuel, we also try to increase the number of electrical and hybrid cars in the company. In our offices we strive to have as environmentally friendly energy as possible.

**Protection of nature** – we strive to reduce the quantity of plastics and packaging and as much as possible of our waste is recycled. Our waste management system ensures that we collect all waste that is generated, and we follow applicable laws and regulations.

Our policy is to use the certified countries documentation in all countries, and the plan is to ISO-certify all countries during 2021.

- Connected Wind Services Sverige AB, is certified according to ISO9001, ISO14001 and ISO45001.
- Connected Wind Services Danmark A/S is certified according to ISO9001.
- Connected Wind Deutschland GmbH is certified from German Berufsgenossenschaft for the implemented Arbeitsschutzmanagementsystem (HSE Management System) according to NFL / ILO-OSH 2001.
